

# Rovers® EndoCervex-Brush®

Polypropylene handle

- Stiff, yet flexible head with protective tip

- Polypropylene handle

\*Image not actual size

## Description

The Rovers® EndoCervex-Brush® is a one piece cytology brush designed to optimize cellular yield in Pap smear specimen collection. The brush features a stiff yet flexible bristle head with a protective tip to enhance the overall collection process. A safety ring just below the bristle head will decrease the possibility of the brush entering the endometrium during collection. The brush head is detachable after collection.

## Dimensions

8" Overall Length (203.2mm)

## Qualities

- Sturdy polypropylene handle
- 600 separate collection "bristles" for the simultaneous collection of cellular material
- Detachable tip

## Standards

- ISO 9001:2008
- ISO 13485:2003
- FDA GMP's
- 510K approved
- Certificate of compliance available with each shipment upon request

## Applications

- Adjunct collection device for female chlamydia and gonorrhea testing
- Pap smear specimen collection
