Canon Check Transport Cleaning Card for CR-25, CR-55, CR-180 and CR-180II

Featuring Waffletechnology™

Recommendation for Waffletechnology Cleaning Cards Usage:

It is recommended to run the cleaning card through the check transport once a day or no less than once a week depending on scanning volume. This will remove ink, dust and dirt buildup from the rollers and reader units. This will extend the interval between required manual cleaning for these components.

Directions:

1. Remove the Ink Cartridge from the machine if present.
2. Select the CleanCR.exe file, select your scanner from the drop down menu.
3. Place the Waffletechnology Cleaning Card in the feed pocket and click **Clean**.
4. Run the cleaning card through the check transport 3-7 times, each time rotating the cleaning card top to bottom as well as flipped over so the cleaning card is inserted each time with a different orientation.
5. Allow 1 to 2 minutes before scanning documents, discard the used cleaning card, and replace the ink cartridge if needed.

Note: the cleaning card is not intended to remove debris from the track, clean the sensors, clean the ink cartridge, or replace the cleaning procedures outlined in the operator manual.

Waffletechnology™ is a registered trademark of the Manufacturer. Patent Pending
