

What Size Glove Should I get?

Everyone's hand is different – so how do they make it “fit like a glove”. It's not like each glove is made to order, we don't ask you to send in a template of your hand and we run out to the factory to custom make the glove. But there are some simple guidelines or rules of thumb – (couldn't resist).

Using a flexible tape measure – (we like cloth) you can approximate the glove size that you will need. Wrap the tape measurer around your hand at the widest point, for most people this may be the knuckle area closest to the palm or the palm itself. Do not include your thumb – if you do the glove will be too big. Round the measurement up to the nearest inch and use the guideline below to find your approximate glove size.

Measurement	Glove Size
-------------	------------

6-7"	X- Small
7-8"	Small
8-9"	Medium
9-10"	Large
10-11"	X-Large
11-12"	XX-Large
