Before the final use of the product, we recommend the user to perform a detailed assessment of the same through the implementation and use of significant samples. Users are responsible for checking the validity of the information provided.

ESTATEC UNIQUE TRACKING CODE (CURE)

The Estatec unique tracking code is an identification code that helps on product tracking. It's used to know data from production dates as well as date of delivery and guarantees. It also has a bar code for easy reading using electronic methods.

In the smock case, a part of the label stays encapsulated so that there is always a backup in case of damage to the exterior tag or label
